

New Mobile App From The World's Most Secure Online File Storage Solution Now Available in Time for Summer Storm Season

Ensures Post-Disaster Access to Critical, Confidential Accounts & Documents From Anywhere

BRISBANE, QLD – 17 Nov. 2016 - Your Digital File, a Brisbane based start-up, has released the Android and iOS application of their cloud-based virtual vault to help people survive worst-case scenarios with the best-case online solution.

“Our goal is to ensure all Australians are able to keep their important files, such as insurance policies, wills, contracts, medical records, passwords and family photos safe and easily accessible in one location,” said Mr Jamie Wilson, Founder and Managing Director of Your Digital File.

While nobody can predict when tragedy will hit, be it illness or criminal activity like identity theft or malicious computer hacking, Australia's annual summer season always promises the potential of natural disasters hitting home.

“Too many Australians lose everything in devastating storms, floods, fires and now there is the ever-present risk of hackers. We keep important confidential documents safe, and this is an important step to help victims of natural disasters or other devastating events rebuild their lives,” said Mr Wilson.

Peace of mind, guaranteed.

- Your Digital File safeguards confidential documents. Files are easily accessible through the **mobile app**, which is free to download on the app store for your device.
- Through **patented Cryptoloc Security**, which is an extra level of security beyond other “cloud solutions,” files are *individually* and *uniquely* encrypted.
- You've got **complete privacy**. Not even Your Digital File can access your information!
- You also have **complete control**. You can authorise restricted or full access to other users.
- Identity fraud is eliminated, as digital signatures are based on **100-point proof of identity**.
- Every single document has a **complete audit trail** or record of whenever it's changed, sent, received or signed.
- You choose a **“trigger event”** that allows autosharing with people you've pre-authorised.
- If you lose your private key information, you can still **recover your files** through a unique account recovery mechanism

Don't wait until disaster strikes to take care of your family. Your Digital File is the leading global solution for the secure management of documents online.
